Cross-reference to related applications

This application claims priority to Swedish patent application 0303533-4 filed 22 December 2003 and is the national phase under 35 U.S.C. § 371 of PCT/SE2004/001931 filed 17 December 2004.

Page 2, sixth paragraph:

The aim of the invention is to remedy the above-mentioned challenges. ~~This aim is obtained by a method characterized by claim 1.~~

Page 6, fourth paragraph:

In another preferred embodiment of the invention, a computer program comprising programming instructions that control a computer or a computer process to perform a method in an industrial system for recording the position of at least one component in a location system of a control system of an industrial facility for an industrial process~~, according to any of claims 1-17~~.

Page 6, fifth paragraph:

Another preferred embodiment of the invention is a computer program ~~according to claim 18~~ recorded on one or several computer-readable media.

Paragraph bridging pages 6 and 7:

Another preferred embodiment of the invention is a graphical user interface ~~according to claim 21~~, wherein the graphical user interface comprises:
- input means to register identification information of the component,
- input means to register position coordinates of the mobile information.

Page 7, first paragraph:

Another preferred embodiment of the invention is a graphical user interface ~~according to any of claims 21-22~~, wherein the graphical user interface comprises display means to identify a component.

Page 7, second paragraph:

Another preferred embodiment of the invention is a graphical user interface ~~according to any of claims 21-23~~, wherein the graphical user interface comprises input means to register the position

coordinates for the mobile information processing device.

Page 7, third paragraph:

Another preferred embodiment of the invention is a graphical user interface ~~according to any of~~ ~~claims 21-24~~, wherein the graphical user interface comprises:
- display means for creating a model of the facility, including position coordinates for major parts of the facility such as sub-areas,
- input means to register position coordinates of the model.

Page 7, sixth paragraph:

Another preferred embodiment of the invention is a computerised industrial system including means to perform a method for recording the position of at least one component in a location system of a control system of an industrial facility for an industrial process~~, according to any of~~ ~~claims 1-18~~.

Page 8, first paragraph:

Another preferred embodiment of the invention is a database containing information to be used in a method in an industrial system for recording the position of at least one component in a location system of a control system of an industrial facility for an industrial process~~, according to~~ ~~any of claims 1-18~~.

Page 8, second paragraph:

Another preferred embodiment of the invention is a comprising means to perform a method in an industrial system for recording the position of at least one component in a location system of a control system of an industrial facility for an industrial process, according to any of claims 1-19.
